

ALUMIX[®] 2

A DESIGNER TRAFFIC LIGHT

ALUMIX 2 is a simple and elegant traffic light, created to blend naturally into the urban landscapes and architecture of our cities.

With its clean lined purity of design, personalized with the colors, logo ...of your town, the new ALUMIX 2 light will give your community its own identity.

In accordance with the principle of sustainable development, ALUMIX 2 is made entirely from recyclable materials.

ALUMIX® 2

Principal Characteristics

Description

ALUMIX 2 consists of:

- > A fine aluminum profile making it resistant to vandalism
- > Three light units consisting of:
 - > A textured and anti-UV treated black polycarbonate ring with waterproof joints
 - > A textured and anti-UV treated removable shape
- > An Equinoxe diode source
- > Two aluminum cast consoles
- > Stainless steel visors
- > 5 m class II cable

Fixings

- > By two consoles rotatable through 180 degrees mounted behind the front face
- > The lower console is fixed and carries the cable whereas the upper console is adjustable

Light source

- > ALUMIX 2 is equipped with bi-voltage Equinoxe diodes 127/230v ac or 24v ac
- > B2/2 opening W
- > Phantom effect 3 to 5 depending on the model

Accessibility

- > Access to the light sources is achieved by swiveling the ring through 5 degrees and removing one screw

Power supply

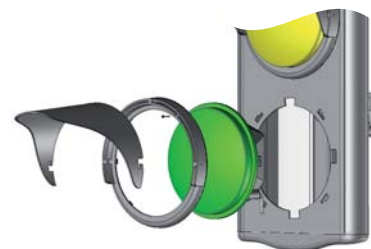

- > 127/230v ac or 24v ac

Dimensions

- > Width 300 mm
- > Height 855 mm
- > Depth 393 mm

Color and shape harmonization

- > To enhance the appearance of your urban space and to adapt to each landscape, ALUMIX 2 can be entirely personalized according to RAL colour chart or your logo
- > The profile is designed so that it can come in a variety of forms of pole solutions (Geronimo)
